

## Introducing road safety tools and resources for your workplace

**Attend a no-charge, 3.5 hour workshop to improve the safety of your employees who drive for work.**

**Wednesday, February 24, 2016**

**Cranbrook Chamber of Commerce  
Meeting Room  
2279 Cranbrook Street North  
Cranbrook, BC**

**8:30 am – 12:00 pm**

### Workshop Description

Co-hosted by Safe Communities Cranbrook and Parachute Canada, this interactive session will help participants to implement or improve a road safety program that fits their organization. Participants learn about the human and financial costs of motor vehicle incidents, and apply hazard identification/risk assessment procedures to prioritize road safety issues. They will use [Road Safety At Work](#) tools and resources to develop action plans aimed at preventing workplace vehicle crashes.

Space is limited to 20 participants so reserve your seat today for this ½-day workshop. We will canvass registered participants before the session and use their suggestions to “customize” the workshop to focus on driving circumstances and road safety challenges that drivers in their workplaces encounter.

### Who Should Attend

The workshop is for owners, managers, supervisors, health and safety practitioners, Joint Occupational Health and Safety committee members and others who have responsibility for making decisions and developing programs to keep their employees safe on BC roads.

You are encouraged to send one or two representatives from your organization. To help you develop and improve your road safety program, we will provide each organization with three hours of follow-up consultation with one of our road safety specialists.
