Dear Sir or Madam,

Students from Mount Baker Secondary School competed in the Skills Canada Provincial Robotics Challenge on April 13 and won the gold medal. As a result, they have been asked to represent British Columbia in the Skills Canada National Robotics competition in Moncton, New Brunswick. Skills British Columbia funds only a tiny share of the cost of transporting and lodging our team and robot in Moncton for the multiday event.

The students started designing and building the robot and many complicated course props needed to practice in early September. Every year our school builds our robots from scratch, which allows students to learn many technical skills. If you would like to see the rules and the challenge we mastered, please follow this link to the Skills BC website: <http://skillsbc.ca/PDF2016/2016BCRoboticsScope.pdf>

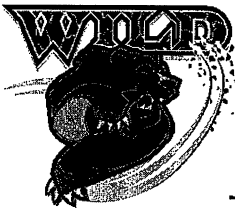

We have managed to overcome many obstacles and become the top team in our province. Our school has a strong record of building excellent robots and winning medals. If you would like to see past robots, please go to our website: <http://mtbakerrobotics.com/videos>

Please help us get to Moncton to represent British Columbia and show the country what we can do. Any donation would be greatly appreciated!

Included in this document is an estimate of the totals costs of completing our quest.

Thank-you for your consideration,

Bill Walker and the Mount Baker Robotics team
